BETTER THINGS THAN WHEAT

Secretary Fisher of Board of Trade Tells Easterners of Claims of the Edmonton District

F. T. Fisher, secretary of the Edmonton Board of Trade, writes to the Toronto Globe:

Anybody who has heard of western Canada has heard of its wonderful yields of hard wheat, much coveted by the miller for the strength and whiteness of the flour it produces. Everybody knows that much, but nearly everybody is left with the impression that the story has then been told, and that the permanent prosperity of the whole country depends upon its ability to continue its production of enormous crops of wheat.

Little has ever been said in immigration literature, or by the many writers who have toured the country, about the many other natural prod-

ucts of at least a considerable portion of the west, which in the aggregate, are much more valuable than wheat, which tend to a better class of farming and more permanently prosperous communities, and ought to prove a much stronger attraction to the experienced and capable farmer of the eastern provinces, or Great Britain, than just growing wheat. Is it that those who are fond of sounding the praises of the Canadian west don't know about these things, or fail to recognize their importance? Or is it assumed that the experienced farmer whom they seek to attract to the western provinces, is anxious to abandon all he has learned about the science of agriculture, and is interested in the growing of but a single crop?

Only the enquiring few are aware that in all the partially timbered portions of the three provinces of Manitoba, Saskatchewan and Alberta, the most wonderful crops of oats, of surprising plumpness and weight, are produced. Even the majority of westerners appear to be unaware of, or fail to realize the importance of the fact, that a great portion of the province of Alberta, notably the partially-timbered parklike country, in the basin of the North Saskatchewan, is now producing a great diversity of crops. In addition to hard wheat, both spring

and winter varieties, oats and barley, the district referred to has proved wonderfully successful in the production of various fodder crops, such as timothy, alfalfa, clover, rape, etc. The soil and climatic conditions are also particularly favorable to the production of luxuriant natural pasture. The light snowfall and comparatively short and easy winter are conducive to the cheap and easy handling of cattle and the successful prosecution of dairy-ing operations.

Here, then are almost ideal conditions for successful carrying on of mixed farming and the profitable employment of the most progressive modern methods, under conditions vastly more favorable than obtain in the eastern provinces of Canada, in Great Britain, or in most of the United States. Yet we continue to talk as if wheat was our only resource.

Professor Thomas Shaw, late of the Minnesota State Agricultural College, one of the highest authorities in America, and who has taken considerable trouble to familiarize himself with conditions in the Saskatchewan Valley in Alberta, recently wrote in a magazine article:

"The virgin alfalfa lands in western Canada, are, acre for acre, worth as much as the highest priced lands in the United States."

No such claim has ever been made on behalf of the all-wheat lands, either

of western Canada or of the western States. Would it not be well for prospective settlers to investigate these other resources, which make for permanently prosperous farms, and for those interested in the development of the Canadian west to let it be known that in at least a portion of Alberta a progressive farmer can put into profitable employment his best ideas on the subject of mixed farming?

CAMROSE!

"THE LUCKY CITY"

The Place Where Fortunes are Being Made in Real Estate

The junction of the three Transcontinental Railway Systems—The Canadian Pacific, the Canadian Northern and the Grand Trunk Pacific—all in operation at the present time. The great wholesale and distributing centre. The town which is bound to grow from 1,500 to 10,000 in three years, because it cannot help it.

The town which has a 4 per cent. better freight rate than Edmonton or Calgary. The town which has the following wholesale houses already located: Georgeson & Co.; G. F. & J. Galt; Massey-Harris Co.; Brackman-Ker Co.; Donnelly, Watson & Co.; Imperial Oil Co., and Calgary Brewing Co.

Those wise persons who knew enough to get in on the ground floor in Edmonton, Calgary and Saskatoon have made fortunes. Yet it took years for these cities to get three railway systems, which Camrose has practically inherited. Properties sold a month ago in Camrose at One Hundred Dollars a lot are now selling at One Hundred and Fifty, and the advance is warranted.

NOW on Sale	EASTMOUNT	For 30 Days
	Subdivision in CAMROSE offers to the man with small means the opportunity of a lifetime—do not miss it. EASTMOUNT is close to the Canadian Northern Station and Yards, and is without doubt the best proposition in Camrose. We are offering this choice property at the following prices:—	
	\$60 to \$80 per Lot TERMS: \$20 Cash down, and balance \$10 per month without interest. 10 per cent. discount for Cash at any time.

GOVERNMENT PLANT FOR MAKING PEAT

Interesting Experiments Being Made by the Dominion Department of Mines

MAKES A CHEAP FUEL

Cost of Production Is Placed at Two Dollars a Ton by the Superintendent

Alfred, Ont., May 30.—There is considerable interest here and in the surrounding country in the Dominion Government peat plant, which has been started here, and which is the first venture of the kind made by the federal authorities in this country.

Several previous efforts to manufacture a commercial peat fuel in Canada had failed, so Dr. Haanel and other officials of the Dominion Mines Branch recently decided to establish an experimental peat plant.

The government acquired a peat bog of 300 acres located at Alfred, near Caledonia Springs, Ontario, fifty miles from the capital. A storage shed that will hold 300 tons of air-dried peat was built; also a blacksmith shop and an office. After machinery was installed, men were set at work digging out the peat bled, and making it into small squares, or, as they are called, peat briquettes.

The process of manufacture is comparatively simple. The peat is shoveled into a carrier, which carries it upwards until it falls into what is known as a hopper. If it is not, when taken from the ground, moist enough, water is automatically sprayed on it, and then it passes from the hopper out into the conveyors, which dump it at a spot where a device for cutting it up into blocks passes over it.

In Open Air
This device passes over it in one direction, making fourteen straight cuts. Then it is cut at right angles to this. This leaves what looks like several hundred pieces of black clay shaped a little larger than bricks. Nature does most of the rest. These wet blocks—for all the world like blocks of black moistened clay—are left there until they dry by the aid of sun and wind. After several days boys turn them over, getting paid at the rate of eight cents a thousand blocks for doing so. Then the other side dries. This takes about three weeks.

The Cost
Mr. Anrep explained that it cost about 80 cents a ton to make the peat. 8 cents per thousand bricks for drying, 15 cents a ton for stacking, and probably 20 cents per ton to take it from the peat plant to the C. P. R.

railway station. He thought it could be laid down there at about \$2 a ton, or selling at a profit of say 25 cents a ton, at \$2.25. The plant started running on May 16th, and already between 200 and 300 tons of peat are out in the open drying. Many curious people have visited it.

Dr. Haanel's Views
Recently, after dwelling on the scarcity of coal and wood in certain parts of Canada, and the importance of following up on the peat deposits, Dr. Haanel made the following remarks: "Considering the fact that we imported during the year 1908 coal to the value of \$2,800,000, constituting an enormous and increasing drain on the wealth of the country, every effort should be made to retain a portion of this money at home, not only to give employment to our own people, but to lessen our dependence upon outside sources." Dr. Haanel also indicated that the known peat bogs of Canada covered about 30,000 acres; that such an area would produce twenty-eight billion tons of air-dried peat, which would be equal in value to fourteen billion tons of coal.

BETTER SHOWS COMING

The recent visit to the east of Mr. Alex Pantages, the owner of the famous Pantages string of theatres, has created a lot of changes in the theatrical situation in the east. Detroit, St. Paul, Minneapolis, Fort William, Port Arthur, and at no future date the Walker of Winnipeg, are now being booked by Mr. Pantages. Edmonton is going to be benefited by this to an extent that is both as surprising as it is gratifying.

Heretofore, Calgary used to be the northern end of the Pantages circuit, by which means that the acts that were booked in Europe and the east would have to jump from New York, Chicago, or wherever they happened to come from, to Calgary, where they were "tried out" for the rest of the houses on the Pantages circuit.

With the new arrangement all this is changed. Detroit is so situated that providing an act does not suit the requirements it is immediately cancelled and another can be procured inside of a few hours—an impossibility at this distance from the centre of the amusement population.

Another feature which made it exceedingly hard to get big acts to come to Calgary and Edmonton, was the expense of jumping from New York or even a longer distance, to Calgary. This is now entirely done away with and Edmonton vandeville lovers can look forward to some great bills from now on. The price of admission is to be raised to 75 cents for the best seats in June 6th, but when it is taken into consideration that the vaudeville prices in both the Dominion and the Walker in Winnipeg range from \$20 down, this is not unreasonable, in fact it is all that makes the production of such expensive bills possible. After witnessing the first bill there will certainly be no regret expressed.

AGREEMENT FOR \$30,000,000 LOAN

Money Goes to China From Britain, United States, Germany and France

WILL CHINA TAKE IT NOW?

It Is Feared That Strong Anti-Foreign Feeling May Block the Arrangement

Paris, May 30.—The Hankow-Szechuen railway loan agreement has been signed. The signers are representatives of financial groups of the United States, France, Great Britain and Germany. The agreement provides for a loan to the Chinese government of \$30,000,000 for railroad construction.

A formal statement issued by the representatives of the financiers and bankers of the loan, states that the agreement is also an equality between the four groups, in which the Americans with the consent of their colleagues, are included.

The statement points out that the agreement further assured an equality of treatment in the matter of tender for supplies.

Americans Are Well Satisfied
This latter condition is regarded as an especial cause for congratulations by the Americans, who consider that they emerge from the negotiations splendidly considering the situation when they entered.

Financial equality and equality in the treatment in the matter of supplies taken by the purchasing agents were obtained and in addition the American group secures a sub-engineer and the construction of 200 kilometers of the branch, while it will also have the building of 400 kilometers of the extension to Szechuen.

Nevertheless the British group gained the chief victory in successfully insisting upon having the engineering rights for the "Hankow Loop," except for certain sub-engineering rights which were ceded to the Americans.

In the matter of materials and facilities for manufacturers at present tenders the four countries will share alike.

Chinese May Repudiate Loan
Now that the agreement has been concluded considerable doubt is expressed whether the Chinese government will accept the loan. Last fall

when the British group blocked the negotiations Peking was most anxious that the plan should be put through. Since then, however, much opposition to the employment of foreign capital has developed in Human province, and it is feared that the recent anti-foreign outbreaks there may influence the government to change its attitude.

THE EAGLE AND THE BAGPIPES

"Music hath charms to calm the savage breast," may be taken as an axiom, and if it were doubted, the testimony of Mr. Andrew Macintosh, of Inverness, ought to silence the scorner. A boat was proceeding from Lochmace to Letterfearn for a hill-fair. A piper was on board. The piper skirted his pipes as he passed Ben Airdie and out flew a golden eagle from his errie. As long as the music continued the eagle remained within gunshot of the boat. The piper having earned his drink, the music ceased. Immediately the bird began to fly shoreward. As soon as the piper re-commenced the eagle at once left the rock and followed the boat. At Isle Maree another hill was made for refreshment, and by the bird through disappointment. On the piper blowing up for the third time the eagle returned to his old position, and followed the boat as long as the music continued.

THE MODERN SCHOOL

The new boy stood confidently before the desk of his prospective pedagogue.

"Have you your vaccination certificate with you?" inquired the learned one.

"Yes, sir," replied the youth.

"Have you been inoculated against group?"

"Yes, sir."

"Have you been vaccinated with the cholera bacillus?"

"I have."

"Got a written certificate to the effect that you've been immune against whooping-cough, measles and scarletina?"

"Yes."

"And you are willing that, at least once every week, all your books be thoroughly fumigated with sulphur, and your clothes disinfected with mercuric bichloride?"

"Yes."

The pedagogue nodded approval.

"Very well, then. As you have conformed with all the necessary protective measures prescribed by our modern hygiene, you may enter that way enclosure, at upon that luminous seat, and begin your lesson on Scientific Squeezing, in relation to Public Health."

GREAT DISCOVERY BY CHICAGO MAN

He is the First Scientist to Isolate an Individual Electrical Ion

OLD THEORIES PROVED

Professor Millikan Is Able to Demonstrate as Facts Important Scientific Theories

Chicago, May 30.—After four years of investigation, Prof. Robert A. Millikan of the physical department of the University of Chicago has announced the proof of facts in electricity which are declared to take rank with those in optical research, which won the Noble prize for a fellow member of the faculty, Prof. Albert A. Michelson.

For the first time, the University of Chicago physicist has been able to isolate an individual ion, or elementary electrical charge, and to measure its value, and he is said thereby to have demonstrated the indelible theory held since 1890 that an electric charge is not "a strain in the ether or an imponderable fluid," but consists of a "definite number of specks or atoms of electricity, exactly alike, peppered over the surface of the charged body."

Composition of a Current

"It follows that an electric current, which is simply a charge in motion consists of a movement of these atoms of electricity, either over the conducting body," he asserted.

"I am not broaching any new theories, but have established beyond doubt several which until I was able to isolate the electrical charge, never were proven. In isolating the ion I was able to see by a method of my own just what it did when separated. Once isolated, the charge could be measured for the first time and was found to be 5.1x10-10 electrostatic units."

Mr. Fletcher and I have been able to give a tangible demonstration of the correctness of the view advanced many years ago that an electric charge is not a homogeneous something spread uniformly over the surface of a charged body, but that it has a definite granular structure."

"It consists, in fact, of a definite number of specks or atoms of electricity, exactly alike, peppered over the surface of the charged body."

Kinetic Theory Is Proven

Another important theory which is proven by the findings of Prof. Millikan is the kinetic theory of matter. Regarding this he declared:

"We have not only shown directly

that a molecule of air is in rapid motion, but we measured the order of magnitude of its energy or agitation and found it to agree with the computations based upon the kinetic theory."

"Our results demonstrate in a new way that the negative ion in air is considerably more mobile than is the positive ion—this means that its velocity is greater and that it moves faster under the influence of an electric field."

THE RECKONING

With no less tread, typical of the fellow, Thomas Cat, crept slowly through the morning to the family water-hucket, and there surveyed his miserable reflection.

"Great heavens!" he exclaimed, "one ear gone!"

"And one eye closed!" he gasped.

"Yet a third time he looked."

"Thirteen gashes," he counted, "part of lower jaw missing, and nothing left of whiskers but stumps."

"My word," he murmured dreamily, "what a Dickens of a glorious old time I must have had last night!"

All Rights Reserved.

"Orville! Orville! Orville!"

Brother Wilbur's voice rose through the air like a veritable monophony, and in thirty seconds Brother Orville, blindfolded in hand, had descended the balustrade with his special gliding action, and was standing beside his co-worker on the cabbage patch.

"Orville!" cried Wilbur again.

"Look! Look up! There's an aviator over your patent!"

"Great snags," he is!" shouted Orville.

"That's our simultaneous warring and steering movement to a 11."

"Call a copper!" screamed Wilbur.

"Froscotte!" roared Orville, applying his eyes to his binoculars.

"But Orville laid a gentle hand upon his brother's sleeve."

"Go on back to work, Wilbur," he murmured, lowering his glasses. "Our mistake. It's only a silly swallow."

TWO SIDES TO A QUESTION

The pie had been underdone, and Bobby had overdone it. Wherefore, he roared lustily all night, having had pains in his yun-know-where.

He roared, and he roared, and he roared, till, at last, there came a sharp knock on the front door, and mamma hastened down to find her neighbor looking haggard with want of sleep, in his dressing gown on the step.

"If he was my child," fumed the man, "I'd spank him."

"He deserves it," admitted mamma.

"But I don't believe in spanking him on a full stomach."

"Neither do I," snapped the worn one, as he shuffled down the steps.

"But all the same I'd spank him."

"How do you mean?" called the outraged mamma.

"I'd spank him," replied her neighbor, "Why I'd turn him over."

DESTRUCTIVE FIRE AT MINNEAPOLIS

Three Large Plants Were Completely Destroyed—Whole Milling District Threatened

LOSS OVER HALF MILLION

Those That Suffered Were the Great Northern, Rock Island and Waterbury Companies

Minneapolis, May 30.—Hundreds of persons were driven from their homes, a damage estimated in the neighborhood of \$500,000 was entailed and the better part of a city block destroyed Saturday morning in a spectacular fire, which consumed the plants of the Great Northern Implement Company, Rock Island Plow Company and Waterbury Implement Company at Third street and Seventh avenue, ended the city's world-famous industry, the flour mills. The milling district was subjected to a literal rain of fire as clouds of punk-like sparks and blazing brands were blown on the roofs and walls, setting fire to freight cars, loading platforms and wooden crossings.

All that remains of two of the largest implement buildings in the Northwest are smoldering heaps of black ruins and piles of jumbled bricks and twisted iron. The loss, estimated by Robert R. Frey, manager of the Rock Island Plow Company, will run for buildings and contents in excess of half a million dollars, of which amount a large portion is covered by insurance.

The three implement firms are completely wiped out. Mr. Frey says the loss of his company will approximate \$200,000 for stock alone, as the building is owned by A. W. Wright, Saginaw, Mich. So far as could be learned, Chris Madison, 2718 Harrison avenue, who was occupying a room on the top floor of the Sixth avenue hotel, was the only person injured. He fell by the police, who went through every lodging house in the neighborhood and awakened the guests and when part of the roof fell on him he was very badly burned about the body. He probably will die.

Self Protection
"Prisoner at the bar," said the jury, pompous and florid. Magistrate, "you are charged with stealing a pie. There has been a great deal of pie-stealing, and I shall make an example of you or none of us will be safe."

London News.

Tenders for Ventilation and other Mechanical Equipment.

Sealed and separate tenders addressed to John Stocks, Deputy Minister of Public Works, Edmonton, registered and endorsed tenders for—
a) Plumbing.

b) Heating, Ventilation and Mechanical Equipment, will be received up to 12 o'clock noon, Thursday (June 30th), 1914.

Plans and specifications may be seen and forms of tender had at the Engineer's Office, Department of Public Works, Edmonton, or at the Branch Office of the Department of Public Works, Calgary.

All tenders must be accompanied by an accepted cheque payable at our Edmonton, to the Minister of Public Works, to the amount of five (5) per cent of the tender, as a guarantee that should a tender be accepted, the bidder is prepared to execute a contract within three days after acceptance.

CANADA BUYS MUCH FROM THE STATES

Increase in Imports From That Country in 10 Months Was 35 Per Cent.

Washington, May 29.—Canada is becoming one of the best customers of the United States. Exports of domestic merchandise from this country to Canada during the first ten months of the current fiscal year, were greater by \$2,000,000 than in the same period of the previous year, while the total increase in exports to all parts during the same period was only \$55,000,000.

The increase in exports to Canada was 39 per cent for the month of April, 1914. The value of the exports to Canada during the first ten months of the fiscal year was \$15,000,000.

The increase was largely in manufactured articles, although there was a decrease in the value of raw materials. If a tender is accepted a marked cheque or guarantee bond of a Surety Company doing business in Alberta, to the amount of twenty (20 per cent) per

an increase of \$2,000,000 in the coal value, as also in cotton, and an increase in wheat from 724,671 bushels to 2,022,656 bushels. In agricultural implements the increase was from \$1,569,831 to \$2,000,722, and in automobiles from \$1,123,273 to \$1,307,450.

COMET IN TWO PIECES

Arizona Astronomer Makes Interesting Discovery Regarding Comet.

Tucson, Ariz., May 29.—That the head, or nucleus, of Halley's comet has divided in two parts is the discovery of Dr. A. E. Douglass of the University of Arizona.

According to Dr. Douglass, the brighter part is in advance of the other about thirty seconds, which is equivalent to three thousand miles.

Dr. Douglass calls attention to the fact that a parallel case was the comet of 1882 which divided into four parts, separated and entirely disappeared.

EMINENT SCIENTIST DEAD

Baden Baden, May 28.—Prof. Robert Koch, the famous bacteriologist, died here from disease of the heart. He was born December 11, 1843.

KAISER CAN'T SIGN STATE DOCUMENTS

An Insect Bite Has Put the Emperor's Right Hand out of Commission

Berlin, May 30.—Emperor William is experiencing some inconveniences because of an eruption on the right hand caused by the bite of an insect. Court physicians declare that there is no danger of serious consequences from the irritation which they expect will disappear in a few days. For the time being, His Majesty has delegated the signature of state documents to Crown Prince Frederick William, and all urgent decrees will appear with the double signatures of the Crown Prince and the Imperial Chancellor, Dr. Von Bethmann-Hollweg, preceded by the notation "By order of the Emperor." This is the first occasion during the reign of Emperor William upon which documents of state have received other than that of His Majesty's autograph.

Announcement

WE HAVE TAKEN OVER the Stock and Fixtures of the Store at 118 Jasper av. West, formerly occupied by Hockley & Co. and will there continue to conduct our Tailoring business.

The necessity of a prominent and attractive display and fitting parlor, and a more commodious shop for the handling of our increasing business will be satisfied by our new arrangement.

Our shop will be located in our old quarters on First Street, and at our new quarters, we will display the largest stock of woollens ever seen in Edmonton. We are prepared to show you a varied line selected from the choicest products of the best English Mills, imported especially to meet the demands for quality of men of taste and discrimination. Our styles are the latest approved and popular creations of the best English and American designers, and will suit the exactions of correct dressers.

Monday, the 30th, we will open in our new quarters and as we do not wish to mix the goods we have taken over with our own stock we must dispose of them in short time. --- **WE WANT TO SELL 50 SUITS IN 10 DAYS.** --- But we are not conducting a Sale. We are not cutting prices. We are giving away this stock of goods and selling you the time of experienced up-to-date Tailors. --- There are many good patterns all of which we dispose of at one price and fortunate first arrivals will have the pick of the lot to be built to their measure at

\$25.00

REMEMBER our motto "Satisfaction or No Sale" holds good during the disposal of this stock also. We will not accept your money for our work unless you consider the exchange fair and satisfactory. We may make a mistake once in a while, but it costs a customer nothing to find we are that human.

About Town

June 23, the King's Birthday, will be observed as a bank holiday by the chartered banks of Edmonton.

There will be a practice of the Irish-Canadian baseball club at the stadium and street grounds this evening at 6 o'clock.

The annual report of the Edmonton school board is ready for the printers and will be in circulation in a week or ten days.

Mr. Logan, of Logan's employment agency, stated this morning that there was still a dearth of good labor with no sign of relief. What men there are available, however, are of a better calibre than formerly.

Fred Maynard was charged in the police court this morning with assaulting Frank Whiteley and was fined \$5 and \$350 costs. J. E. Bailey and Louis Goulet were assessed the usual fine of \$4 and \$5 costs for being drunk.

Canton Lodge, Edmononton No. 1, Pastmasters M. J. O. F., held an election of officers on Saturday. They were: Captain and Commander, C. S. Beale; Lieutenant, J. R. Ensign; R. H. Haskell; clerk, H. G. Spencer; accountant, F. J. Charles; standard bearer, D. L. Baker; guard, W. Orchard; sentinel, O. T. Vankusick; picket, D. S. Sub-Orland.

A telegram was received this morning from Mr. Arthur Hawkes, who is accompanying Aid. Twigg of Bristol England, stating that the latter has accepted with pleasure the invitation from the Edmononton Canadian Club to address its members tomorrow, at a luncheon to be given in his honor at the King Edward Hotel. It is not known whether Mr. Frank Bullen, the eminent writer, will accompany him or not, but it is pretty certain that Mr. Bullen will be there shortly at any rate.

COFFIN BEARERS THREATEN STRIKE

Assistants at Funerals in French Capital Do Not Like Wearing Opera Hats

Paris, May 30.—On the issue of caps vs. opera hats, the coffin-bearers of Paris are today threatening a strike. They have issued an ultimatum to the undertakers syndicate that unless they are permitted to replace the uncomfortable hat "de la haine" by caps while officiating at funerals, they will all go on strike.

The request thrust the undertakers into a fine French frenzy, but they replied that the dignity of the French funerals must be preserved at all hazards. The "bean eaters," as the coffin-bearers are known in France, say they will give the undertakers two weeks to consider their request, and if it is refused, they will walk through the streets of Paris with caps on their heads and opera hats in their hands.

CADET CORPS SHIELDS

The particulars regarding the Governor General Challenge Shields for cadets have been announced. It goes to the municipality of over 5000 inhabitants which has the largest number of cadets in proportion to its population on May 21st last. The shield will be held by the cadet corps of the winning town or county, which upon inspection by the District Officer Commanding or any other selected military officer, shall show the greatest proficiency in military drill and rifle shooting.

ACQUITTED OF SERIOUS CHARGE

Saskatoon, Sask., May 30.—Douglas McGregor, the young man from St. Thomas, Ontario, who was arrested here a few weeks ago, charged with seducing a young girl named Rose at Pacific, Ontario, arrived back in the city, having been honorably acquitted.

WOULD DESTROY IMBECILE BABIES

Starting Suggestion Made by a Detroit Physician and Applauded by His Audience

Detroit, Mich., May 30.—The custom of savages who destroyed infants born hopelessly imbeciles was applauded at a clinic of the Detroit College of Medicine alumni at St. Mary's hospital.

Among the children submitted for examination was a baby girl bearing all the stigmata of degeneration. Dr. R. Beck of New York, who was conducting the clinic, excused the child's mother from the room, and then, turning to the assembled physicians, said:

"Some surgeons operate in a case like this, trephining the brain from the back of the skull to give the brain room. I have watched the results of such operations and I am convinced that the untutored savages were more wise than we in their treatment of such cases. They took such children and—"

The sentence was completed with a significant gesture that drew a burst of applause.

FUNERAL COST \$1,400.00

London, May 30.—King Edward's funeral, with its attendant expenses, cost \$1,400,000, which expense will be defrayed from the public purse. King George was stunned when he heard of the huge outlay and is having the accounts investigated and rectified for as he has never before known such a bill. There is great joy at Windsor since the new King and Queen let it be known that they will make Windsor Castle their chief residence. Already the private apartments are being made over for them.

Personal

His Honor, the Lieutenant Governor, will leave for Calgary this afternoon, and will return to Edmonton tomorrow.

F. C. Dunham, editor of the Camrose Canadian, is in the city today.

McCallum Moore, assistant secretary of the Edmononton Exhibition Association, left for Halifax yesterday afternoon.

Joseph Driscoll, clerk of the district court, is able to be around again after his serious illness.

Hon. Frank Oliver, Minister of the Interior, arrives in Edmonton this evening on the late train from the south. Rooms have been reserved for him at the Alberta Hotel.

BOUGHT A TOWNSHIP

Saskatoon, Sask., May 30.—A party of American land buyers from Marshtown, Iowa, were in the city Saturday. They had just purchased a township of land. The party were here a few months ago, and last week returned to put through their extensive deal. When they get back to the United States, they purpose sending farmers to this country to cultivate their lands.

A. W. COOPER WAS FOUND GUILTY

Former Merchant of Nutana, Sask., Obtained Goods With the Intent to Defraud

Saskatoon, Sask., May 30.—A. W. Cooper, the ex-Nutana merchant, was found guilty in the supreme court before Justice Lamont, of obtaining goods to the amount of \$80 from Marshall Wells company, with intent to defraud.

There were several other charges against Cooper, but it is understood that these have been withdrawn. The prisoner arrived here about fifteen months ago and claiming that he had a large amount of money in England, to prove which he produced letters of credit from various bankers, which afterwards proved bogus, bought a store from B. A. Archibald and goods from various wholesalers, sold out his stock, pocketed the proceeds and gave his creditors the slip. He was captured, brought back to the city to stand trial and after being allowed out on bail, jumped his bonds and disappeared last May. He was not heard of again until April of this year, when he was captured at Calgary, and brought back to Saskatoon to stand trial.
